HASSAN AWAN

Software Developer

(514) 963-4744 | awan.hassan@outlook.com | Montreal, Quebec | linkedin.com/in/hawan24

SUMMARY

Detail-oriented Software Developer with hands-on experience in backend and frontend development, test automation, and scalable web applications. Skilled in Java, C#, Spring Boot, ASP.NET, and AWS. Proven contributor in Agile teams, delivering clean, maintainable code and user-centric solutions. Actively building full-stack projects to sharpen cloud and mobile development skills.

SKILLS

Programming & Frameworks: PHP, JavaScript, C#, Java, SQL, ASP.NET MVC, Spring Boot, Laravel, Liquid (Shopify)
Tools & Platforms: Git, Postman, JUnit, Selenium, Docker, AWS (S3), CI/CD, Visual Studio, Eclipse
Databases: PostgreSQL, MySQL, MS SQL Server
Core Competencies: RESTful APIs, Unit Testing, Agile/Scrum, OOP, Performance Optimization
Operating Systems: Windows, MacOS, Linux

EXPERIENCE

Freelance Shopify Developer
06/2026 - 08/2026

Cats and Totes — *Remote*

- Customized a Shopify theme using Liquid, editing templates, sections, and blocks to implement the client's brand vision for layout, color scheme, and page structure.
- Set up the product catalog and configured storefront settings to match the client's requirements.
- Iterated through rounds of client feedback from onboarding through launch (Aug 8, 2026).

Freelance Software Developer
12/2025 - 03/2026

Madame Poulet — *Remote*

- Connected Cluster POS, Zapier Pro, and HubSpot CRM to track promotional redemptions across 7 locations.
- Integrated Cluster REST API to capture order data and route customer records into HubSpot automatically.
- Assessed full stack (POS, UEat, Google Tag Manager, Google Analytics (GA4), HubSpot) to define scope and document integration constraints.
- Managed client communication around scope, deliverables, and pricing independently.

Software QA Developer - Intern
05/2022 - 12/2022

UKG — *Montréal/Remote*

- Developed automated UI and API tests using Java, Selenium, and Postman, improving regression efficiency and product reliability.
- Configured and maintained Jenkins pipelines for automated regression testing, supporting continuous integration and early bug detection.
- Participated in Agile sprints to identify, debug, and prevent defects early in the release cycle.
- Enhanced CI/CD test coverage by integrating reusable functions into automation pipelines.
- Strengthened product stability by designing tests for API performance and edge-case validation.

Web Developer
07/2020 - 10/2021

Lowkler - Zako Enterprises — *Remote*

- Built and maintained full-stack web applications using C#, ASP.NET MVC, SQL Server, and JavaScript.
- Created and consumed RESTful APIs, integrated third-party services (e.g., Stripe, Google Maps), and optimized DB performance.
- Implemented modular, maintainable code following MVC architecture and security best practices.
- Worked closely with clients and teammates to deliver features aligned with business needs.
- Coordinated with teammates via Slack and GitHub to deliver features on schedule, improving project turnaround by 20%.

Web Developer - Intern
01/2020 - 05/2020

Oshara Inc. — *Montréal*

- Developed and modified webpages using PHP (Laravel), HTML, CSS, Bootstrap, JavaScript and jQuery.
- Improved user experience metrics by 30% by creating internal admin dashboard for main site.
- Produced MySQL queries and modular backend logic to streamline data management.

PROJECTS

Basketball Court Locator App

(In Progress) App to find and review nearby outdoor courts in Montreal.

- Built a mobile-first React Native app (Spring Boot + PostgreSQL backend) for discovering basketball courts in Montreal, using REST APIs.
- Implemented geolocation search, user reviews, and AWS S3-backed photo uploads for scalable media handling.

EDUCATION

Diploma of College Studies (DEC) in Computer Science Technology
John Abbott College
Sainte-Anne-de-Bellevue, Quebec

Languages: English — Native | French — Proficient
